Introduction

Who is this book for?

Business Vocabulary in Use Elementary is in the same series as *Business Vocabulary in Use Intermediate* and *Advanced*. It is designed to help you to learn basic business vocabulary. It also helps you to learn the language of business communication for social situations, telephone calls, business writing, presentations, and meetings.

The book is for people who are studying English before they start work, and for people already working who need English for their job.

You can use the book on your own for self-study, or with a teacher in the classroom.

What is in the book?

In the book there are 49 two-page units.

The first three units are **learner training units**. They give you ideas on the best ways to learn. They explain the instructions used in the book, how to do the exercises, how to learn vocabulary and how to use dictionaries. It is a good idea to do these units first to help you use the rest of the book in the best way.

There are then two units about how to use **numbers**.

After that, there are 28 **subject units** with key vocabulary for different business subjects, and 16 units with **business communication language**. These help you with the **skills** you need in business, for example in presentations and meetings.

The new words and expressions for you to learn in each unit are in **bold**. They are explained in different ways, for example with a sentence showing you how to use them, or with pictures. Sometimes there is a '=' symbol, followed by some words to explain the new language.

You can use the **contents** pages at the beginning of the book to find the subject or skill that you want to study.

There is an **answer key** at the back of the book. Most of the exercises have questions with only one correct answer. But in some of the exercises, including the **Over to you** activities at the end of each unit (see below), you write and/or talk about yourself and your own organization. So the answers in the key for these sections are examples, to compare with your own answers.

There is also an **index**. This is a list of the new words and expressions in the book and the unit numbers where they appear. The index also tells you how to say the words and expressions.

The left-hand page

This page shows the new words and expressions for each subject or skills area. Each page has a number of sections with the letters A, B, C (and sometimes D), and short titles.

On the left-hand page there is:

- information about the meanings of the words and expressions.
- information about word combinations - words that are often used together.
- notes on language points such as the differences between British and American English.
- notes to tell you where you can find more information in other units.

The right-hand page

The exercises on the right-hand page give you practice in using the new words and expressions shown on the left-hand page. There are different types of exercise for this. Sometimes the exercise asks you to write sentences, or to write words to finish sentences. Some units contain tables or diagrams to complete, or crosswords.

'Over to you' activities

An important part of *Business Vocabulary in Use Elementary* is the **Over to you** activity at the end of each unit. The **Over to you** activities give you the chance to practise the words and expressions from the unit in a way that is useful in your own job or studies.

Self-study learners can do this section as a written activity.

In the classroom, the teacher can use the **Over to you** exercises for discussion with the whole class, or in small groups. After the discussion the teacher can ask learners to look again at the words and expressions that have caused difficulty. Learners can then do the **Over to you** exercise as a written activity, for example as homework.

How to use the book for self-study

Find the subject or word that you are looking for in the contents page or the index. Read the information on the left-hand page of the unit. Do the exercises on the right-hand page. Check your answers in the key. If you have made mistakes, go back and look at the unit again. Note down important words and expressions in your notebook.

How to use the book in the classroom

Teachers can choose units that relate to learners' needs or interests, for example areas they have covered in course books, or that have come up in other activities. Alternatively, lessons can contain a regular vocabulary slot, where learners look at the vocabulary of particular subject or skills areas.

Learners can work on the units individually or in pairs or groups, with the teacher going round the class assisting and advising. Teachers should get learners to think about the logical process of the exercises, pointing out why one answer is possible and the others are not.

We hope you enjoy using this book.

Learning vocabulary

To help you remember vocabulary, keep a vocabulary notebook. Write the words that you learn from this book in it.

A

Word combinations

You do **exercises** in this book. Sometimes, you make **mistakes**.

Words used together are **word combinations**. To help you remember word combinations, write in your vocabulary book: do an exercise and make a mistake.

Word combinations show you which words can go in front of another word, and which words can go after it. More examples of word combinations:

verb + preposition: I work **in** the sales department. (Unit 43)

noun + noun: **company** car, **company** restaurant, **company** pension (Unit 25)

verb + noun:

arrange miss cancel	a meeting

Using a dictionary

A

What dictionaries do I need?

You should use two dictionaries: a good **bilingual dictionary** (= English and your own language) and a good **English-English dictionary**, like the *Cambridge Essential English Dictionary*.

The bilingual dictionary is easier to understand, but the English-English dictionary can give you more information about a word or phrase. It's good to work in English as much as possible.

B

What information does a dictionary give?

Each entry gives:

- the meaning(s). Sometimes there is more than one meaning.
- the pronunciation (= the way that you say a word) using the phonetic alphabet.
- grammar information (if the word is a noun, verb, adjective, adverb, etc.).
- example phrases or sentences.
- common word combinations and expressions (in the *Cambridge Essential English Dictionary* these are in bold).
- words with opposite meaning, if there are any.

company /'kʌmpəni/ *noun*

1 (*plural companies*) an organisation which sells things or services: *a software company*

2 [**no plural**] when you have a person or people with you: *I enjoy his company.*

A dictionary entry

C

How should I use my dictionary?

Here are some ideas to help you.

- Many words have more than one meaning. The first meaning is not always the one that you want. Look at all the different meanings.
- When you look up a word, put a ✓ next to it. When you go back to the page later and see the ✓, check that you remember the word without looking at the meaning.
- If you see an English word in a text, try to guess the meaning and continue to read. Then use your dictionary to check the meaning.
- If you look up an English word in a bilingual dictionary and find several different words in your own language, look up the English word in an English-English dictionary to find the right meaning.

Use the *Cambridge Essential English Dictionary (CEED)*, or another English–English dictionary, to do these exercises.

3.1 Answer the questions.

- 1 In *CEED*, the entries for words beginning with 'A' use 21 pages. What letter of the alphabet uses the most pages? How many pages does it use?
.....
- 2 What letter of the alphabet has the smallest number of entries? How many entries are there?
.....
- 3 What entry comes before 'employee'? What entry comes after it?
.....
- 4 'rose' is the past tense of a verb. If you want to find out which verb, where in the dictionary do you look?
.....
- 5 Put these entries in alphabetical order: 'worker', 'worth', 'work', 'worse', 'world', 'World Wide Web'.
.....

3.2 Look at the entry for 'heavy'.

- 1 How many meanings are there?
.....
- 2 Write the word in the phonetic alphabet.
.....
- 3 Is it a noun, a verb, or an adjective?
.....
- 4 What is its opposite?
.....

3.3 Look at the entry for 'job'.

- 1 Can you use this word in the plural?
.....
- 2 What example phrases and sentences are there?
.....
- 3 In which expressions can you use 'job'?
.....
- 4 Can you use these expressions in American English?
.....

3.4 Look at the entry for 'business'.

- 1 Is it a noun, a verb, or an adjective?
.....
- 2 How many meanings does it have?
.....
- 3 What example phrases and sentences are there?
.....

Jobs and work

Charlotte Stone talks about BISG:

'I work for BISG, British International Stores Group. In our shops, we have **employees** (= people who work for our company) who have **full-time jobs**. Full-time employees usually work around 40 hours a week, but they can also do **overtime**, where they work longer and get more money.

Some employees have a **part-time job**. For example, some people work 20 hours a week.

Most people at BISG have a **permanent job** – they have no finish date.

Some people here do **temporary work** for a short period.

Every employee has a **contract**, an agreement about how long they work, when they work, etc.'

Note: You don't say 'a work'.

B

Stopping work

'When employees at BISG are 65, they **retire** (= stop work because of their age).

They receive a good **pension** (= payment for people who retire).

If someone leaves the company, for example to move to another company, they **resign** (= tell the company they are leaving).

We **make people redundant** if we don't need them anymore – if we don't have work for them, or if we have financial problems.

If someone has done something wrong or stupid, then we **dismiss** or **fire** them (= ask them to leave the company).'

Amounts of money 1

You talk about **exact** (= complete) amounts of money like this:

\$12.99	twelve dollars (and) ninety-nine cents twelve dollars ninety-nine twelve ninety-nine
£211.53	two hundred and eleven pounds (and) fifty-three pence two hundred and eleven pounds fifty-three two hundred and eleven fifty-three
€33,972.35	thirty-three thousand nine hundred and seventy-two euros (and) thirty-five cents thirty-three thousand nine hundred and seventy two euros thirty-five thirty-three thousand nine hundred and seventy two, thirty-five

When you write amounts of money on a **cheque** (= printed form from the bank), you give as much information as possible:

\$12.99	twelve dollars (and) ninety-nine cents
£211.53	two hundred and eleven pounds (and) fifty-three pence
€33,972.35	thirty-three thousand nine hundred and seventy-two euros (and) thirty-five cents

€6,500,000,000	six and a half billion euros
¥19,750,000,000	nineteen and three quarter billion yen

To learn more about fractions, see Unit 5.

C

Approximate amounts

When you want to give an idea of the size of the figure, you use 'of':

This camera costs	hundreds thousands millions billions	of	pounds. euros. dollars. yen.
-------------------	---	----	---------------------------------------

You can also use words to show that the figure is not exact – it is near this amount, but may be higher or lower.

The price of this house is	about around roughly approximately	£2,500,000.
----------------------------	---	-------------

When you give an **exact figure** (= complete amount), you do not use the word 'of'. For example, you say:

This camera costs **five hundred and twenty-five euros**.

Note: 'Approximately' is more formal than 'about', 'around' and 'roughly'.

In some states in the US, and in some other countries, you pay sales tax on things that you buy. For example, in Pennsylvania, the rate of sales tax is 6 per cent.

This beautiful book is \$100.00 per copy.
Pennsylvania residents add sales tax of \$6.00.

The basic price is \$100 and you add six dollars sales tax if you live in Pennsylvania.

In Europe and some other places, you pay VAT (value added tax) at a particular rate on some products and services. For example, the rate in France for most things is 19.5 per cent, and in the UK it's 17.5 per cent.

Mountain Castle computer game

Accounts

Kim is the teacher we met in Unit 24.

I'm with ADKL Bank. I have a cheque account with a cheque book so I can write cheques (= printed forms from the bank). My salary is paid directly into my account. I also have a savings account where I save money and earn interest (= money the bank pays you).

I can transfer money between these two accounts – I can move money from one account into the other. I can go to the bank to do this, but it's easier to use ADKL's internet banking service.

The bank send me a statement (= a printed list of payments from and to the account) every month, showing me the balance (= how much money I have in the account).'
